Hello Joe:

I believe that there may be a more direct way of doing the off premise collocation for COs. Attached please find the complete Verizon Tariff for collocation and a PDF of page 4 of the tariff which I made the following changes to:

### 2.5 Adjacent

An adjacent collocation arrangement permits a CLEC to construct or procure a structure on Private or Company property for collocation for the purposes of provisioning expanded interconnection and/or access to unbundled network elements in accordance with the terms and conditions of this tariff. Adjacent collocation is only an option when one the following conditions are met:

- Space is legitimately exhausted in the Company's premises for caged and cageless collocation or CLEC is going on Private property; and
- It is technically feasible to construct or procure a controlled environment vault or similar structure on Private or Company property that adheres to local building code, zoning requirements, and Company building standards.

With the addition of these eight words in the above three sentences it should resolve the "Off Premise Collocation" Issue. Please forward this to your Collocation person in TX and have him call with any questions.

Also attached is Attachment 4 of a BellSouth Agreement for Non - Fiber interconnection with SouthEast Telephone in Kentucky.

Thanks

Jim Keller
